

Cecil "Lee" Steveson

Lee was raised in a small town in Newcastle Wyoming. After graduating from Newcastle High School, Lee started his Air Force Career. Lee has traveled to numerous assignments with the Air Force to include, Okinawa and Tokyo Japan, Philippines, Korea, Thailand, Guam and other assignments throughout the United States. Lee is married to the former Jeanne Fisher of Vienna Missouri and they just celebrated their 26th anniversary. Lee has one daughter that lives in Reeds Springs, MO. Lee and Jeanne reside in Branson MO, where he is enjoying retirement.

Lee and his wife live in Branson and spend a lot of time on the park either camping or just visiting the park to enjoy the facilities and let the TL staff know how much we appreciate them. I am a strong believer that if we did not have the great team of volunteers or employees TL we would not be the wonderful park that it is.

Some of the goals I would like to see a focus on is to have more pull thru sites for larger camping rigs and accessibility of 50 amp service. I believe some of the older sites will need to be looked at and budget expenses to either level them and put concrete pads in or turn them into pull through sites instead of back in ones. As a previous business man I believe the Board of Directors should monitor financial items such as budgets, 1,3 and 5 year strategic plans for the park.
